

ALL-IN-ONE SCREEN & KEYBOARD CLEANING SYSTEM

The award winning LensPen® technology cleans all types of laptop computer screens quickly and easily.

INSTRUCTIONS FOR CLEANING SCREENS

1. Turn off the computer and allow the screen to cool to room temperature.
2. Slide out the Keyboard Brush and use it to clean both the keyboard surface and between the keys (be sure to turn the Brush sideways during this process).
3. Slide out the Screen Brush and use it to remove dust from the screen surface.
4. Prior to the first use of the LapTop-Pro™ Cleaning Pad, wipe the screen surface with the Conditioning Tissue to remove any "hard" deposits. Discard the tissue after using.
5. Remove the cap to release the LapTop-Pro™ Cleaning Pad. Clean fingerprints on the screen with smooth circular motions of the Cleaning Pad. Use index finger to put some pressure on the Cleaning Pad – see over.

LapTop-Pro™ by **LENSPEN®**

IS-334

6. If some smudges persist, breathe gently on the area to be cleaned and repeat the process.
7. Replace the cap over the Cleaning Pad.
8. When required, replace the Cleaning Pad by pressing the Release Lock, then twist the old Cleaning Pad out and twist the new Cleaning Pad in.
9. **Important:** do not use on wet surfaces or touch with your hands. LapTop-Pro™'s cleaning compound is carbon-based, similar to a pencil lead. It leaves black marks on all surfaces which are not very, very smooth.
10. For more detailed information, please see www.lenspen.com

Please carefully observe the instructions for use. **IMPORTANT:** clean only when screen is dry, turned off and in cold mode. Do not use on nylon mesh or anti-glare screens
