

LENSPEN[®] ORIGINAL[™]

Welcome to LensPen!

Important – Please Read Carefully

- This website is the official authorized English language website for LensPen.
- The products described herein and offered for sale are original products designed in Canada by Parkside Optical Inc. and produced by our factory in China. They have been tested and proven in the worldwide marketplace for many years.
- In 2012 the pen was stylishly redesigned. Lenspen[®], DigiKlear[®], FilterKlear[®], MiniPro[®] and MicroPro[™] now sport the new organic barrel design. See *figures 1 and 2* to see the old and new designs. There are many of the old style design pens still on the market with reputable vendors. Please check our website for a list of the vendors.

fig. 2) RE-DESIGNED STYLING

- There are some companies marketing “imitations” or “false” copies of Lenspen products. Lenspen products use a unique carbon compound on the cleaning tip to remove fingerprints. Some “imitations” have nothing on the cleaning tip – they have no cleaning ability at all! Other “imitations” put unknown substances on the tip – they often damage the lens and LCD surfaces they are meant to clean!

WARNING

DO NOT USE THESE PRODUCTS!

How does a true LensPen differ from a false copy?

- Our Lenspen brand name is always on the pen and the backcard: *(SEE OUR BRANDS LISTED ON THE LEFT OF THIS PAGE).*
- On the rear side of every backcard is written “Distributed under the Authority of Parkside Optical Inc. Vancouver, Canada”. All our products are sold worldwide through a network of authorized distributors. A partial list of our distributors can be found on our website www.lenspen.com
- Our LensPen, DigiKlear and FilterKlear pens have “LensPen” inscribed in the Top of the cap.

- Lenspen products are part of a ‘family’ – we have a complete range of cleaning systems for cameras, binoculars, cameraphones, laptop computers, TV screens, etc. No other company offers such a range of products – they simply try to copy one or two product models.

- Here are some examples of “imitation” products:

DO NOT RISK DAMAGE TO YOUR LENSES WITH SUCH PRODUCTS!

If you have any questions please contact us.

We will be glad to help.
