

LENSPEN®

Elite

LONG LIFE **500+** USES

SAFE ON ALL LENSES

NO LIQUIDS

Welcome to LensPen®!

Important – Please Read Carefully

- ▶ The official authorized English language website for LensPen is www.lenspen.com.
- ▶ The products described herein and offered for sale are original products designed in Canada by Parkside Optical Inc. (doing business as “The LensPen Group”) and produced by our factory in China. They have been tested and proven in the worldwide marketplace for many years.
- ▶ In 2012 the LensPen was stylishly redesigned. LensPen®, DigiKlear®, FilterKlear™, MiniPro® and MicroPro™ now sport the new organic barrel design. In 2014 LensPen Elite™ with Invisible Carbon was introduced. See *figures 1 and 2 below* to see the old and new designs. There are many of the old style design pens still on the market with reputable vendors. Please check our website for a partial list of our [customers and OEM partners](#).

WITH ORIGINAL BLACK CARBON
(black barrel and cap)

WITH INVISIBLE CARBON
(with white barrel and cap)

- ▶ There are some companies marketing imitations or fake copies of LensPen products. LensPen products use a unique carbon compound on the cleaning tip to remove fingerprints. Some imitations have nothing on the cleaning tip – they have no cleaning ability at all! Other imitations put unknown substances on the tip – they often damage the lens and LCD surfaces they are meant to clean!

WARNING
DO NOT USE THESE PRODUCTS!

How does a true LensPen® differ from a false copy?

- ▶ Our LensPen brand name is always on the pen and the backcard. See our brands listed on the left side of this page.
- ▶ On the rear side of every backcard is written “Distributed under the Authority of Parkside Optical Inc., Vancouver, Canada.” All of our products are sold worldwide through a network of authorized distributors. Click [here](#) for a partial list of our world-wide distributor network.
- ▶ Our LensPen®, DigiKlear® and FilterKlear™ pens have “LENSPEN” inscribed in the top of the cap:

- ▶ LensPen products are part of a “family” – we have a complete range of cleaning systems for camera lenses and DSLR sensors, binoculars, mobile phones, tablet touchscreens, laptop computers, TV screens, eyeglasses and sunglasses, etc. No other company offers such a range of products – they simply try to copy one or two product models.
- ▶ If you have any question about genuine LensPen products, please contact us at info@lenspen.com.
